# Mind Uploading

“The popular term "mind uploading" (sometimes called "mind copying" or "mind transfer") is the hypothetical process of copying mental content (including long-term memory and "self") from a particular brain substrate to a computational device, such as a digital, analog, quantum-based or artificial neural network.”

Importance:

Modern technology dramatically affecting human existence - achieving practical immortality of consciousness!

Importance:

A huge leap in mankind development that not only achieves the immortality of consciousness, but transforms humanity into a cosmic factor for changing the Universe!
